Atomic Literals

type	typical values	
boolean	true	false
number	15	7.82

Strings

Basic string - two interchangeable options:

```
'basic string'
"basic string"
```

One can use one inside the other:

```
console.log('The dinosaur "jumped into the mud"')
```

Output:

```
The dinosaur "jumped into the mud"
```

Multiline String

```
`line 1
line 2
...`
```

Example:

```
console.log(`The dinosaur
jumped into the mud`)
```

Output:

```
The dinosaur
jumped into the mud
```

Not a Number (NaN)

A usual output for wrong expressions.

```
console.log(8 - 'x')
```

Output:

```
NaN
```
